(a) SOR (ω = 1.932), Taylor-Green 64²
residual norm (units of ∇²p; scaled: -)
iteration k
L1n (mean |r|)
L2n (rms r)
L∞ (max |r|)
scaled L2n = L2n / S
(b) same physical problem on finer grids
norm of the initial residual r0 = b (interior rows)
number of unknowns N = n² (-)
L1 (unnormalised) (slope 0.99)
L2 (unnormalised) (slope 0.50)
L1n (mean |r|) (slope -0.01)
L2n (rms r) (slope -0.00)
L2n incl. ghost-point boundary rows (slope 0.24)
