Jacobi (ω = 0.95): residual vs change per iteration
scaled L2$_n$ = L2$_n$ / S
change $\|p^{k+1} - p^k\|$ (L2$_n$)
true error $\|p^k - p^*\|$ (L2$_n$)
naive ε = 1e-06 on the change
change < 1e-06 at k = 6697
but scaled residual = 6.1e-04
and true error = 1.7e-03
