Kovasznay Re=20: grid convergence of the reconstructed pressure
pressure error (%) = 100 x relative L2
grid spacing Δx (non-dimensional; finer →)
order 1, clean: fitted slope 1.00
order 1, noisy (σ = 1 %, W = h), mean ± std
order 2, clean: fitted slope 1.96
order 2, noisy (σ = 1 %, W = h), mean ± std
1 % target
order 1: 1 % reached at dx = 0.00334 (extrapolated)
order 2: 1 % reached at dx = 0.0258
